

Cable protective conductor A-PS

Some additional mechanical protection is often needed for installed cables. The split cable conduits of Type A-PS consist of HDPE and are especially suitable for this type of use. Firstly, they meet the requirement of using cable conduits made of PE instead of PVC and secondly, they can be quickly and permanently installed without the need of any additional tools or aids and are suitable for laid uncut cables of all types.

NOTE: The standard colour is black.

Type	Outer x inner diameter (mm ²)	Length (m)	PU (m)
A 58 PS	58 x 50	5	550
A 83 PS	83 x 75	3	180
A 110 PS	110 x 100	3	162
A 120 PS	120 x 110	3	144
A 160 PS	160 x 138	3	72
